

Bohong (Lucia) Liu

23300160032@m.fudan.edu.cn | 94007369.github.io | GitHub: 94007369

RESEARCH INTERESTS

Computational Political Science; Text-as-Data; Quantitative Methods; Political Economy.

EDUCATION

Fudan University | Shanghai, China | September 2023-present

B.A. in International Politics; GPA: **3.89/4.00**.

Selected coursework: Quantitative Research Methods (A), Principles of Economics (A), Calculus (A), International Law (A).

University of California, Los Angeles | Los Angeles, CA | Fall 2026

Undergraduate Exchange Student (non-degree).

Stanford University | Stanford, CA | Summer 2026

Summer Session Student (non-degree).

CS109: Probability for Computer Scientists (A); POLISCI 157: Politics of Artificial Intelligence (A+).

SELECTED RESEARCH PROJECTS

Measuring Private-Sector Embeddedness in U.S. AI Governance

Final Research Project | Stanford POLISCI 157 | Summer 2026

Developed Private-Sector Role Policy Embeddedness (PRPE), an actor-level measure of the seniority, recency, and policy relevance of officials' prior private-sector ties. Built and verified a dataset of senior U.S. AI-governance officials to compare embeddedness across the Biden and second Trump administrations.

Cross-Regional Digital Collaborative Capacity in China's Carbon Trading Market

FDU-ECNU-SJTU Academic Forum | May 2025 | Best Paper Award

Applied TF-IDF and LDA to policy documents to study cross-regional collaborative capacity. Conducted interviews with enterprises and the Shanghai Environment and Energy Exchange to contextualize and validate findings.

Sustaining Juneau: A Policy-Driven Approach to Tourism Resilience

Team Leader | Mathematical Contest in Modeling | January 2025 | Meritorious Winner

Used Python to collect, clean, and visualize policy and tourism data. Applied nonlinear regression, logistic regression, and the Analytic Hierarchy Process to evaluate policy trade-offs and construct a sustainability score. Authored and edited the team report in LaTeX.

Climate Change's Impact on Transnational Migration in Bangladesh

Quantitative Research Methods Course Project | December 2024

Used R to analyze population mobility, conduct model diagnostics and robustness checks, and visualize results.

RESEARCH ASSISTANT EXPERIENCE

Political Psychology & Gender Politics | Prof. Xing Chen | Fudan University

Collected, organized, and cleaned quantitative datasets on women's political representation; reviewed literature on political trust diffusion.

Digital Governance & Environmental Policy | Prof. Ziteng Fan | Fudan University

Contributed computational policy text analysis and interviews to the carbon trading research described above.

HONORS & TECHNICAL SKILLS

Honors: Chinese National Scholarship; Fudan University Outstanding Student Scholarship; Outstanding Student Leader Award; Best Paper Award, FDU-ECNU-SJTU Academic Forum (2025); MCM Meritorious Winner (2025).

Programming: Python, R, Stata. **Text analysis:** TF-IDF, LDA, policy document analysis.

Quantitative methods: Regression, statistical modeling, data visualization.

Research tools: GitHub, LaTeX, Excel.
